

## Automatic Synchronat

### General Overview

- Fill accuracy of  $\pm$ /- 1% or better
- Horizontal bottle centering system
- Scalable filling stations
- Programmable Controller
- Fallen bottle sensor at infeed
- Dispenses free flowing to high viscosity liquids
- Design allows you to expand from 2 to 20 nozzles as production demands increase
- Optional multi-stroke system extends range beyond one Liter

Unique Performance. Undeniable Quality. Unrivaled Support.
