

CT100 / CT200 - Cap-tightening System

General Overview

- Single and dual-head compressed air-actuated cap-tightening chucks
- Modular design allows integration with new and existing packaging systems
- Partially enclosed system with an integral conveyor
- Free-standing stainless steel construction
- Custom hand swappable indexing turrets for each container profile, several sizes and styles of cap torquing chucks to fit several cap types
- Included operator workstation with affixed cap storage bin

Unique Performance. Undeniable Quality. Unrivalled Support.
